

Welcome to the **Future of Machining**

App+ Bundle Information Packet

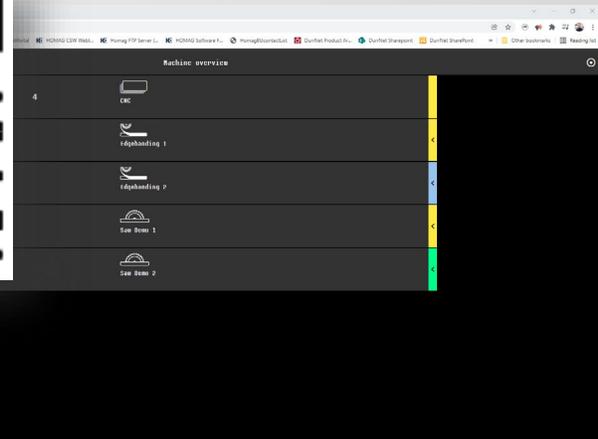

tapio

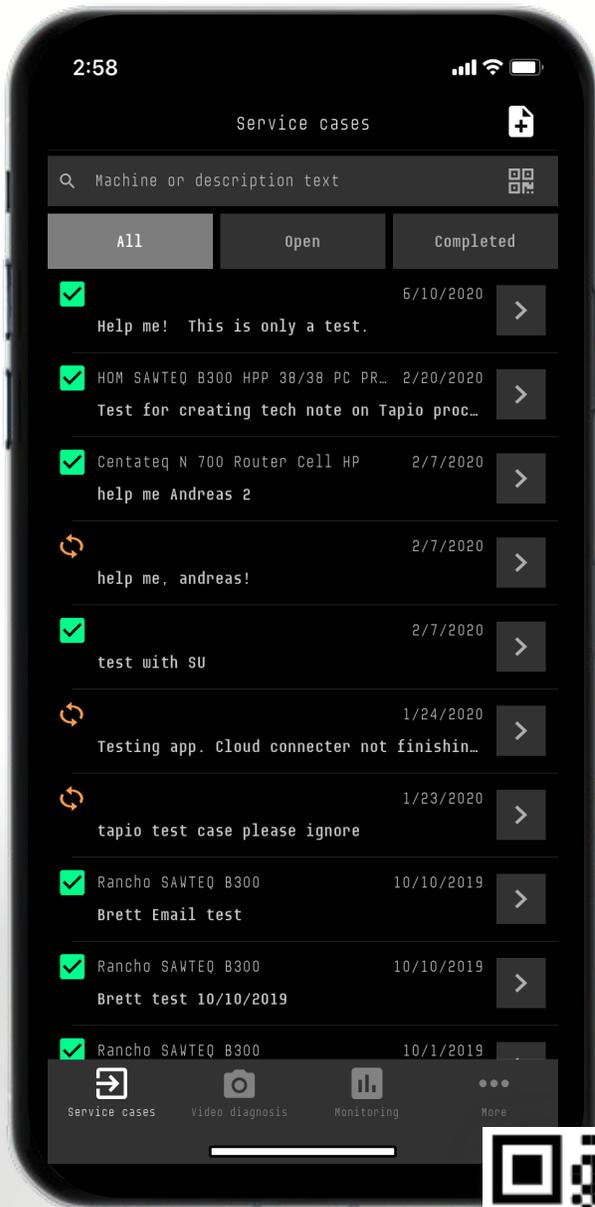

Monitor machine states from anywhere in the world. View % of complete job and time remaining.

#MachineBoard

Web UI available for office use

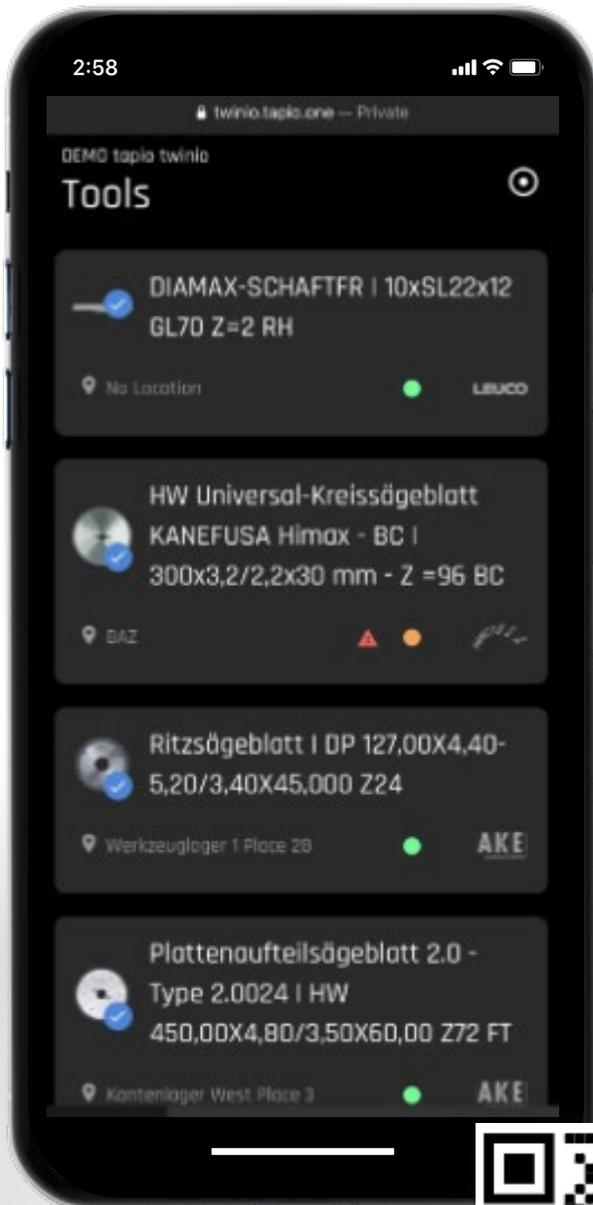

STILES | HC
A HOMAG COMPANY

Request technical support, order & price parts, monitor machine maintenance, view machine documentation and perform video diagnostics.

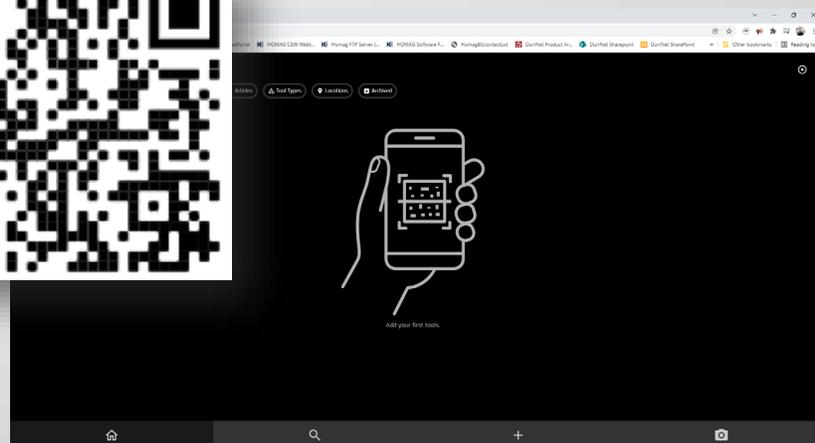

#ServiceBoard

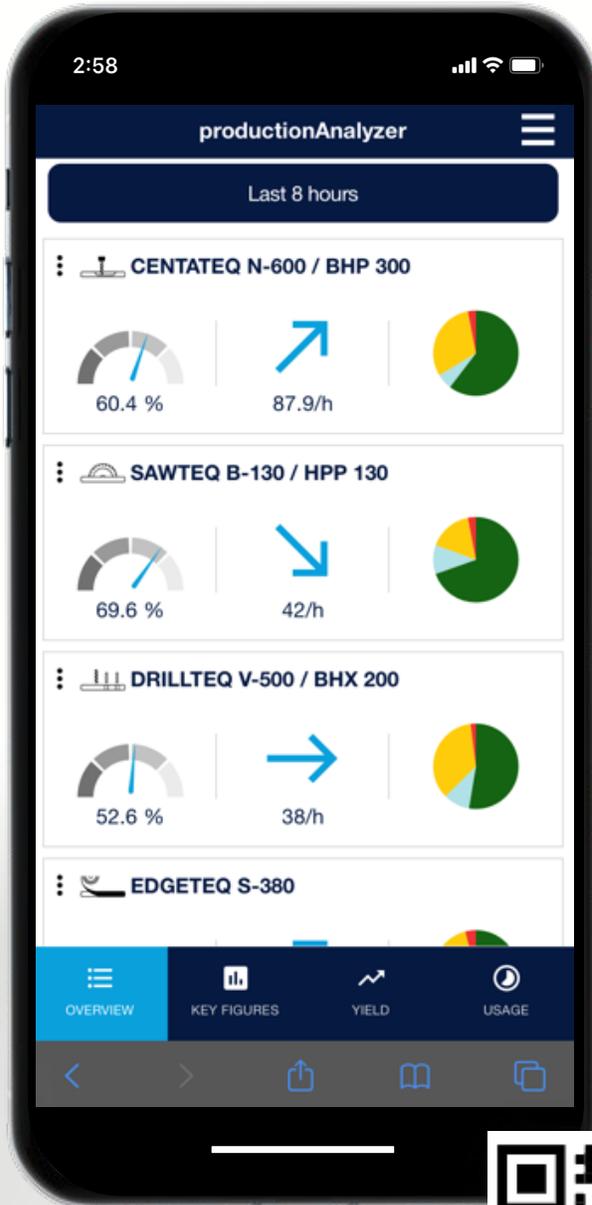

Manage your tools digitally with twinio. The web app twinio provides you with a quick and easy overview on your resources - on your smartphone and on your desktop.

#Twinio

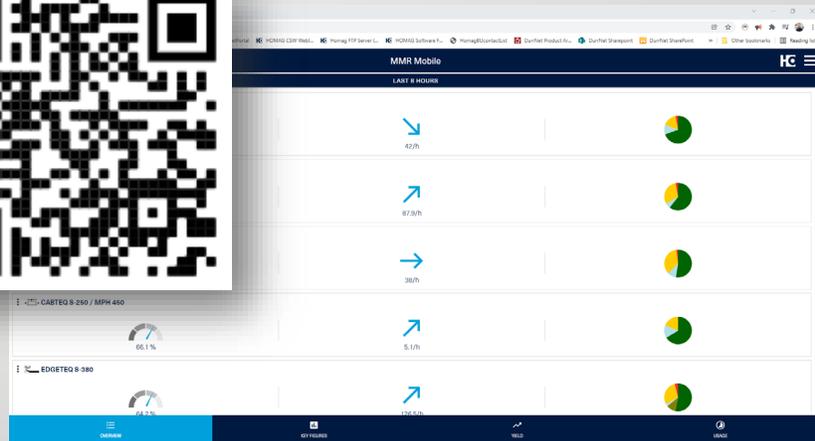

Web UI available for office use

STILES | HC
A HOMAG COMPANY

Graphically display machine efficiency data, parts production, main usage and machine state overview. MMR Mobile is free forever!

#MMRmobile

Web UI available for office use

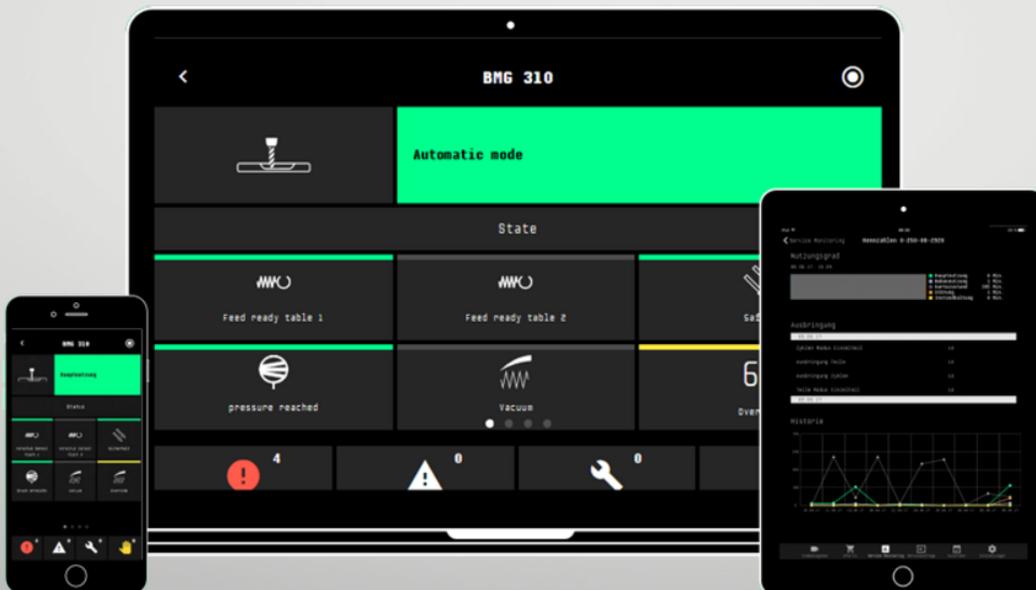

How to access the apps?..

Step 1: Fill out and sign the account registration form provided by your installation coordinator. That's it!

Once the form has been signed, please send it back to your installation coordinator. Your tapio account will then be created. Shortly after, you will get an email requesting to register a password. Once logged in to you tapio account, you can download and use your apps.

Your apps will start displaying machine data (where applicable) once your tapio machines have been connected during machine installation process by your Stiles technician.

For additional training or questions, please contact techsupp@stilesmachinery.com or call 616-698-6615

FAQ

Q: What apps are included in the “App Plus Bundle”?

A: MachineBoard, ServiceBoard, & Twinio are included for 12 months free of charge. You will also get access to MMR Mobile free of charge forever!

Q: Does this require a credit card at any point?

A: During the initial promotional period, no. About 1 month before your trial expires, you will receive an email requesting to continue your tapio subscriptions. From that point, you can choose to renew or simply let the trial expire.

Q; How to I get additional help with my tapio account?

A: Just like a machine, you can contact Stiles technical support if you have any questions at techsupp@stilesmachinery.com or by calling 616-698-6615 during normal business hours.

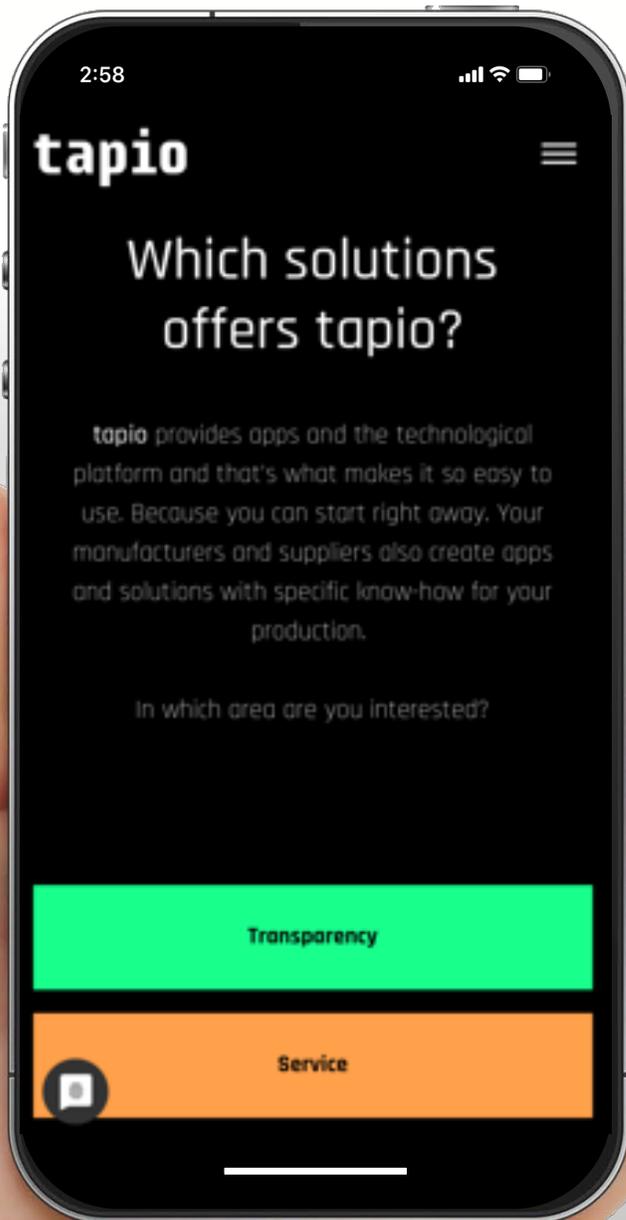

Q: Is my production and manufacturing data safe with tapio?

A: Absolutely! Data is always transmitted and stored encrypted, even within tapio. A secure administration of the keys is especially important. Since tapio is based on Microsoft Azure, we consistently use all security functions offered by Azure. For all keys, secrets, and guidelines, this is the certified key store Key Vault. With Azure Threat Detection, Protection, and Analytics, the latest artificial intelligence-based methods for threat detection and defense are also used. More information can be found [here](#).

Email us (stilesdigital@stilesmachinery.com) anytime or call with additional questions.
